ABSTRACT

The data presented in the statistical tables in this document represent all categories of direct Federal Science and Engineering (S&E) support to institutions of higher education in the United States. The 15 federal agencies included provided virtually all funding for S&E Research and Development (R&D) at universities and colleges. In addition, data are reported on these agencies' obligations to nonprofit institutions. Sections include: (1) Federal S&E Obligations to Universities and Colleges which includes trends, summary, geographic distribution, institutions ranked in order of amount received, institutional listings by state, historically black colleges and universities, and systems of universities and colleges; (2) Federal S&E Obligations to Nonprofit Institutions; (3) Federal S&E Obligations to Selected Consortia; and (4) Federal S&E Obligations to Federally Funded Research and Development Centers. LETTER OF TRANSMITTAL

Dear Mr. President:

It is my honor to transmit to you the statistical report, *Federal Science and Engineering Support to Universities, Colleges, and Nonprofit Institutions: Fiscal Year 1994*, in accordance with the National Science Foundation Act of 1950, as amended.

Respectfully yours,

Neal Lane

Neal Lane
Director

The President
The White House
Washington, DC 20500

ACKNOWLEDGMENTS

The preparation of *Federal Science and Engineering Support to Universities, Colleges, and Nonprofit Institutions: Fiscal Year 1994*, was managed by Richard J. Bennof, Analyst, National Science Foundation (NSF), Division of Science Resources Studies (SRS), Research and Development Statistics Program (RDS), under the overall direction of John E. Jankowski, Jr., Program Director, RDS, with guidance and review provided by Alan R. Tupek, Deputy Director, SRS. The text was edited by Anne Houghton, SRS Publications Manager and Julia Harriston. Quantum Research Corp. (QRC) of Bethesda, MD, under NSF contract number SRS 94-21044, prepared the tables and report copy. QRC staff members who worked on this project were Heidi L. Clark, Gail H. Henry, Hilary E. Jones, Elizabeth H. Peto, and Jennifer D. Ranwez.

FOREWORD

Institutions of higher education, the major source of the Nation's scientists and engineers, perform about one-half of the Nation's basic research. Therefore, the level, distribution, and characteristics of Federal academic support are of much interest to officials at Federal, State, and local levels and in nongovernmental sectors.

The National Science Foundation Act of 1950, as amended, requires that the Foundation " . . . initiate and maintain a program for the determination of the total amount of money for scientific and engineering research, including money allocated for the construction of the facilities wherein such research is conducted, received by each educational institution and appropriate nonprofit organization in the United States, by grant, contract, or other arrangement from agencies of the Federal Government, and to report annually thereon to the President and the Congress."

To fulfill this requirement, the Foundation has utilized the data collection system originally designed by the Committee on Academic Science and Engineering of the Federal Council for Science and Technology. The Foundation annually collects statistical data from the 15 Federal agencies that account for virtually all support for science and engineering (S&E) research and development at educational institutions. Data are also collected on these agencies' obligations to nonprofit institutions.

Since its inception, this survey system has been the sole source of data on Federal funding to individual institutions for S&E activities and therefore attracts a wide audience. These data provide information that enables users to examine patterns of support for individual institutions over time and to compare such patterns with those of other institutions.

We are grateful for the continued cooperation of the responsible staff members in the participating agencies, and we appreciate their efforts to assist us in ensuring the quality of their data submissions.

Alan R. Tupek
Deputy Director
Division of Science Resources Studies
National Science Foundation

B. Detailed statistical tables: Federal science and engineering obligations	17

OVERVIEW

Federal agencies' obligations for science and engineering (S&E) activities at universities and colleges increased 8 percent (6 percent after adjusting for inflation) in fiscal year (FY) 1994, to a new high of $13.7 billion. This increase followed last year's slight decline in Federal academic S&E funding but is consistent with the average annual 9-percent current-dollar increase (3 percent in real terms) between 1973 and 1992.

Categories of Support

There are six academic S&E funding categories: (1) research and development (R&D); (2) fellowships, traineeships, and training grants (FTTG); (3) R&D plant; (4) facilities and equipment for instruction; (5) general support for S&E; and (6) other S&E activities. R&D support ($11.8 billion in FY 1994) continued to account for $6 of every $7 of academic S&E funding and increased nearly 8 percent in FY 1994 (table A). Over one-half of all academic R&D obligations ($6.4 billion) and over nine-tenths of its total increase were from Department of Health and Human Services (HHS) programs, mostly National Institutes of Health (NIH) projects in the biological and medical sciences.

Table A. Federal academic S&E support, by type of activity: FYs 1993-94

	(Millions of dollars)		(Percent change)	
	FY 1993	FY 1994	Current $	1987 $
S&E total	12,731	13,739	7.9	5.9
R&D	10,923	11,768	7.7	5.7
R&D plant	259	214	-17.4	-18.9
Facilities for instruction	32	49	52.7	49.7
FTTG	526	634	20.5	18.2
Gen Support	66	139	110.3	106.3
Other S&E	924	934	1.1	-0.8

SOURCE National Science Foundation/SRS, Survey of Federal Science and Engineering Support to Universities, Colleges, and Nonprofit Institutions, Fiscal Year 1994

Four of the other five academic S&E categories showed increased support levels, with three (FTTG, facilities and equipment for instruction, and general support for S&E) increasing at rates higher than inflation. FTTG funds rose by over 20 percent in current dollars to a new high of $634 million; most of the increase was provided by HHS (which accounted for over three-fifths of FTTG support) and the Department of Education (ED). Funds for instructional facilities and equipment grew by 53 percent to a record $49 million, most of the increase coming from the Department of Defense (DOD). General support for S&E, following a steep decline the previous year, more than doubled from FY 1993 levels with NIH and the National Oceanic and Atmospheric Administration (NOAA) of the Department of Commerce responsible for most of the growth. R&D plant obligations dropped more than 17 percent in current dollars to $214 million; over one-half of the R&D plant support in FY 1994 was supplied from the National Science Foundation (NSF). Other S&E activities totaled $934 million (up by 1 percent in current dollars), with the Department of Agriculture (USDA) the source of over two-fifths of the total.

Agency Sources

HHS, NSF, and DOD collectively accounted for nearly four-fifths of the FY 1994 academic S&E obligations. Each of the three agencies showed increases exceeding inflation; funding grew at constant-dollar rates of 12 percent, 7 percent, and 1 percent, respectively. The USDA, the National Aeronautics and Space Administration (NASA), and the Department of Energy (DOE) were responsible for three-fourths of the remaining academic S&E funding. Of those three agencies, only NASA reported a current-dollar increase although its support level failed to exceed the 2-percent inflation rate.

University Shares

In FY 1994, only 31 percent of all universities and colleges receiving Federal S&E obligations granted doctorates, but 96 percent of all academic S&E support was obligated to these doctorate-granting institutions. This reflects the preponderance of R&D funds in Federal S&E support and the concentration of academic R&D activity in these institutions. The top 100 university S&E recipients in FY 1994 (out of 1,113 institutions, excluding 40 system offices) accounted for 81 percent of the total and are all doctorate-granting institutions. The Johns Hopkins University (including its Applied Physics Laboratory) continued as the leading recipient of Federal academic S&E support (table B); four-fifths of its $764 million total was for R&D programs that were funded largely by DOD and HHS. As in the prior year, the top 20 universities, ranked by Federal S&E obligations, accounted for 36 percent of the academic S&E total. Nineteen of the top 20 university S&E recipients in FY 1994 were also among the top 20 in FY 1993, with the University of Southern California being the new entrant (now 19th). Fully 48 percent of DOD's academic S&E support went to

these 20 leading university recipients in FY 1994, as did 40 percent of all academic S&E funds from HHS. NSF's academic S&E funding is less concentrated: 31 percent of its funds went to the top 20 recipient universities nationwide. Of the 6 largest Federal agencies funding academic S&E, the USDA supplied the smallest share (14 percent of its total) to the leading 20 universities.

Geographic Distribution

Over two-thirds of all Federal S&E support to academic institutions in FY 1994 was concentrated among 14 States, each the recipient of over $300 million in S&E obligations to universities and colleges. These States were located along the Atlantic and Pacific coasts and within the East North Central (i.e. Great Lakes) Region. Texas was the only $300 million-plus recipient outside of those regions. California and New York universities and colleges continued to receive the largest amounts of Federal academic S&E obligations. Academic institutions within those 14 States also accounted for over two-thirds of all federally financed R&D expenditures at doctorate-granting institutions and enrolled almost two-thirds of all graduate S&E students (table C).[1]

Historically Black Colleges and Universities (HBCUs)

Federal S&E support for 76 HBCUs increased by 21 percent (contrasting a 5-percent decline the year before) and totaled $281 million in FY 1994. R&D projects accounted for 63 percent of all HBCU support, smaller than the 86-percent share among all academic institutions. The miscellaneous category "other S&E activities" accounted for the second largest portion of S&E support at both HBCUs (14 percent) and among all academic institutions (7 percent). Nearly three-fourths of the HBCU total funding increase, though, was for R&D programs. Clark Atlanta University, the recipient of $26 million in total S&E support and $22 million in R&D funding, replaced Howard University

[1]NSF/SRS, Survey of Scientific and Engineering Expenditures at Universities and Colleges, FY 1994 and NSF/SRS, Survey of Graduate Students and Postdoctorates in Science and Engineering: Fall 1994

Table C. Federal academic science and engineering support to states receiving at least $300 million, fiscal year 1994

State	S&E support	Share of total S&E
	(Millions of dollars)	(Percent)
Total S&E	$13,739.3	100.0
California	1,812.2	13.2
New York	1,134.1	8.3
Maryland	957.4	7.0
Massachusetts	854.3	6.2
Pennsylvania	792.1	5.8
Texas	725.6	5.3
Illinois	505.0	3.7
North Carolina	503.0	3.7
Michigan	433.4	3.2
Ohio	371.5	2.7
Washington	366.5	2.7
Georgia	316.7	2.3
Wisconsin	313.9	2.3
Florida	305.4	2.2
All other States	4,348.1	31.6

SOURCE: NSF/SRS, Survey of Federal Science and Engineering Support to Universities, Colleges, and Nonprofit Institutions, Fiscal Year 1994

as the top HBCU recipient in terms of both total S&E and R&D support. Of the 76 HBCUs obligated S&E funds in FY 1994, 48 of them showed current-dollar increases from the prior year. The leading 20 HBCU recipients accounted for 78 percent of all HBCU S&E support. The USDA and HHS together obligated over one-half of all academic S&E dollars to HBCUs in FY 1994.

Independent Nonprofit Institutions

In FY 1994, Federal agencies' support for S&E R&D and R&D plant to 1,070 independent nonprofit institutions (excluding obligations to Federally Funded Research and Development Centers administered by nonprofit institutions) totaled $3.1 billion, a slight (1.5 percent) current-dollar decrease for the second consecutive year. Research institutes, numbering less than one-fourth of all recipient nonprofit organizations (which also include voluntary hospitals and other independent institutions such as private foundations and trade associations), accounted for 56 percent of all nonprofit funds. The proportional number of research institutes has decreased over time, but their proportional share of nonprofit funding has remained strong. Ten years earlier, for example, in FY 1984, research institutes accounted for over two-fifths of all recipient nonprofits and received 64 percent of all nonprofit support. As in the prior year, six of the top 10 nonprofits —including the leading two nonprofit institutions, the Mitre Corporation and the Draper Laboratories—ranked by FY 1994 obligations levels were research institutes (table D). The three largest voluntary hospital recipients (the Massachusetts General Hospital, the Brigham and Women's Hospital, and the Scripps Clinic & Research Foundation), as in the previous year, were among the top 10 nonprofit institutions. Eight of the top 10 nonprofit recipients were among the leading ten in FY 1993, with the Henry M. Jackson Foundation and the Research Triangle Institute being the new entrants. The top 10 nonprofits accounted for over one-third of all Federal S&E R&D and R&D plant funds to nonprofit institutions in FY 1994. Last year's top recipient, Universities Research Association for Superconducting Super Collider (URA SSC) Lab, was terminated by DOE and received no funding in FY 1994.

Of the Federal total, DOD provided 32 percent of all funding to nonprofit organizations, and about $7 of each $8 from DOD supported research institutes. HHS supplied 45 percent of all Federal nonprofit support and almost all Federal support to voluntary hospitals.

Table D. Federal R&D and R&D plant obligations to the leading 10 independent nonprofit institutions ranked by total amount received in fiscal year 1994

(Millions of dollars)

SOURCE: NSF/SRS, Survey of Federal Science and Engineering Support to Universities, Colleges, and Nonprofit Institutions, Fiscal Year 1994

General Notes

The data presented in these tables represent all categories of direct Federal science and engineering (S&E) support to institutions of higher education in the United States. The 15 Federal agencies included provided virtually all funding for S&E research and development (R&D) at universities and colleges. In addition, data are reported on these agencies' obligations to nonprofit institutions. Data on field of S&E disciplines, on type of institutional control, and on highest degree granted were not published in this report but are available upon request.

Data Limitations and Relationship of This Survey to the Survey of Federal Funds for Research and Development

Data presented in this report on R&D and R&D plant by agency sometimes differ significantly with such data presented in the annual National Science Foundation (NSF) survey titled Federal Funds for Research and Development, referred to hereafter as the Federal funds survey. The treatment of interagency transfers explains much of the difference in the totals. Interagency transfers of funds obligated to an academic or nonprofit institution are reported in the Survey of Federal Science and Engineering Support to Universities, Colleges, and Nonprofit Institutions (Federal S&E support survey) by the agency that actually obligates the funds to the receiving institution. In the Federal funds survey, however, obligations are reported by the initiating agency.

Each of several agencies utilizes personnel from separate internal offices to respond to the two individual surveys, and each frequently collects data from different sources. Data for the Federal S&E support survey, for example, are generally processed from award files, whereas Federal funds survey data are usually derived from agency budget documents.

Respondents from the separate internal offices that participate in the two surveys also frequently differ in their interpretation of the survey questions. The National Institutes of Health, for example, report Biomedical Research Support Grants under "general support for science and engineering" in the Federal S&E support survey but under "research and development" in the Federal funds survey. Regarding the structure of the surveys themselves, the data presented in this report differ in two main ways from those presented in the report on the Federal funds survey, as follows.

1. The two surveys differ in number of agencies involved. In the Federal S&E support survey, the 15 Federal agencies that obligate virtually all of Federal support to academic R&D collect data on all Federal S&E obligations to institutions of higher education. For the Federal funds survey, data are gathered on budgets for R&D and R&D plant from all 32 Federal agencies that conduct such programs.

2. The scope of information gathered differs. Data collected in the Federal S&E support survey pertain to individual academic institutions. Those collected in the Federal funds survey relate to all types of performers and are detailed as to character of work (basic research, applied research, and development).

The fiscal year (FY) 1994 data shown in this report were submitted by the following Federal agencies, listed by the acronyms or abbreviated forms under which data were reported for them:

- AID - Agency for International Development
- Com - Department of Commerce
- DoD - Department of Defense
- DOT - Department of Transportation
- ED - Department of Education
- EPA - Environmental Protection Agency
- DOE - Department of Energy
- HHS - Department of Health and Human Services
  - ACF - Administration for Children and Families
  - AHCPR - Agency for Health Care Policy and Research
  - AoA - Administration on Aging
  - ATSDR - Agency for Toxic Substances and Disease Registry
  - CDC - Centers for Disease Control and Prevention
  - FDA - Food and Drug Administration
  - HCFA - Health Care Financing Administration

HRSA	-	Health Resources and Services Administration
IHS	-	Indian Health Service
OASH	-	Office of the Assistant Secretary for Health
NIH	-	National Institutes of Health
SAMHSA	-	Substance Abuse and Mental Health Services Administration
SSA	-	Social Security Administration

HUD	-	Department of Housing and Urban Development
Int	-	Department of the Interior
Labor	-	Department of Labor
NASA	-	National Aeronautics and Space Administration
NRC	-	Nuclear Regulatory Commission
NSF	-	National Science Foundation
USDA	-	Department of Agriculture

The following abbreviated references are used:

FFRDC	-	federally funded research and development center
FTTG	-	fellowships, traineeships, and training grants
FY	-	fiscal year
n.e.c.	-	not elsewhere classified
R&D	-	research and development
S&E	-	science and engineering
SRS	-	Division of Science Resources Studies, NSF, which produces this report

Obligations shown for universities and colleges do not include funds obligated to FFRDCs administered by academic institutions. FFRDCs are R&D-performing entities that are formed to meet a particular Federal R&D objective that cannot be met effectively by existing organizational resources. They range from the traditional contractor-owned/contractor-operated or Government-owned/contractor-operated organizational structures to various degrees of contractor/Government control and ownership.

The data exclude financial support of an indirect nature, such as funds allocated to State agencies, even if the final recipient of such funds is known to be an academic institution.

Because of rounding, data shown in the text or tabulations may not add to the totals or subtotals. Reported obligations were rounded to the nearest thousand dollars.

For further information concerning the availability of Federal S&E support survey data and the technical aspects of this survey, please contact—

Information Sources

Data Tapes

Public-use tapes from the Integrated Academic Science and Engineering Data Base are available for purchase and will normally be shipped within 3 working days from order receipt. Data tapes from the most recent surveys (1994) are currently available. Individuals interested in obtaining data tapes from the NSF Surveys of Academic Science and Engineering should request a copy of the *Guide to the Data Files from the National Science Foundation's Annual Surveys of Academic Science and Engineering*, which contains order forms and detailed information about the tapes. This document may be obtained by calling NSF's Division of Science Resources Studies at (703) 306-1772.

Institutional Profiles

Selected data items for individual doctorate- granting institutions and schools with science and engineering departments that grant a master's degree are available on computer-generated institutional profiles. An institutional profile consists of data not only from this survey, but from NSF's other two academic S&E surveys: the Survey of Scientific and Engineering Expenditures at Universities and Colleges (R&D expenditures survey) and the Survey of Graduate Students and Postdoctorates in Science and Engineering (graduate student survey). For information on obtaining one or a limited group of institutional profiles, please call Richard J. Bennof at (703) 306-1772.

CASPAR

Users are now able to acquire data from several academic S&E resources on CD-ROM or over the internet. The compact disk contains the Computer-Aided Science Policy Analysis and Research (CASPAR) database system, which is an easy-to-use tool for retrieval and analysis of statistical data on academic S&E resources. For information on downloading CASPAR using a Web browser or anonymous FTP, connect to: http://www.qrc.com/ nsf/srs/caspar/ start.htm.

CASPAR provides the analyst with an extensive and growing data library with multiyear statistics on the state of higher education in general and on academic S&E resources specifically. This data library is developed from multiple sources using standardized institutional names and field of S&E definitions. The CASPAR program includes built-in help capabilities to facilitate the use and interpretation of the data.

CASPAR data are drawn from a number of sources. All data are available at the individual institution level, at the State level, and at the national level. Longitudinal data from surveys of universities and colleges conducted by the NSF Division of Science Resources Studies include the Federal S&E support survey and R&D expenditures survey in addition to the graduate student survey. Data from the surveys of universities and colleges conducted by the National Center for Education Statistics include earned degrees, opening fall enrollment, faculty salaries, tenure and fringe benefits, and financial statistics. Data from other sources include the National Research Council Doctorate Programs Ratings.

For additional information on CASPAR, write or fax your request to the following address:

SECTION A.

TECHNICAL NOTES

Scope of Survey

Data presented in this report are collected annually through the National Science Foundation's (NSF) Survey of Federal Science and Engineering (S&E) Support to Universities, Colleges, and Nonprofit Institutions (Federal S&E support survey). The survey originated in 1965, when the Committee on Academic Science and Engineering (CASE) within the Federal Council for Science and Technology established the CASE data collection system in order to report annually to the council on Federal S&E obligations to academic institutions and associated federally funded research and development centers (FFRDCs). Since 1968, CASE data, as well as data on nonprofit institutions, have also served as the basis for an annual report to the President and Congress.

This survey is designed to collect information from Federal agencies on (1) total S&E program support in thousands of dollars to academic institutions, (2) total S&E support to FFRDCs administered by academic institutions, and (3) research and development (R&D) and R&D plant support to nonprofit institutions and associated FFRDCs.

The fiscal year 1994 data in this report were submitted by 15 Federal agencies, covering the period October 1, 1993, through September 30, 1994. Data reported by the Agency for International Development, the Departments of Housing and Urban Development, Labor, and Transportation, and the Nuclear Regulatory Commission were combined, because of space constraints, to constitute the "other" category in tables that show funding by agency. In 1994 these five agencies accounted for less than 1 percent of all Federal S&E academic support. In most tables that list data by agency and by individual institution, the "other" column includes data from the Department of the Interior in addition to the above five agencies. In 1994 the 15 agencies reported obligations to 1,113 universities and colleges, 40 academic system offices, and 1,070 independent nonprofit institutions.

In fiscal year 1994 the Johns Hopkins University Applied Physics Lab (APL) accounted for $463 million of Johns Hopkins' $466 million in total funding from the Department of Defense (DoD). During the FY 1987 survey cycle, DoD determined that some funds reported in prior years as R&D obligations to APL were more appropriately classified as "other sciences and engineering." Data for FYs 1984-86 were revised, but DoD was unable to revise data prior to FY 1984.

To better differentiate between that part of the Federal R&D budget which supports "science and key enabling technologies" (including for military and nondefense applications) and that which primarily concerns "testing and evaluation of large technical systems prior to production" (of mostly defense-related systems), NSF now collects from DOD development dollars in two categories, advanced technology development and major systems development.

As a result of trend editing of the Department of Education's (ED's) data each year, a small number of academic institutions' dollar totals are distributed by type of activity (R&D, R&D plant, etc.) on a prorated basis through FY 1992 by NSF because ED could evaluate the data only on a "total obligations" basis. During the FY 1987 survey cycle, ED determined that institution coding problems in earlier years caused its database to produce several large funding trend shifts at specific universities.

ED has made major software modifications to the automated system from which the Federal S&E data were produced. Therefore, due to a revamped coding structure, there are trend differences among institutions' data from ED beginning for FY 1993. Those trend differences were a major factor in NSF's decision not to publish "non-S&E" totals beginning for the FY 1993 report. ED accounted for 91 percent ($5.9 billion) of the total Federal support for "non-S&E" ($6.5 billion) for FY 1993. To explain ED's downward academic R&D trend between FY 1993 and FY 1994 (from $95 million to $34 million), that agency stated that academic R&D programs were not funded in FY 1994, or did not have a science and engineering component in FY 1994, or received reductions in funding in FY 1994.

Data are shown for Federal S&E obligations to institutions classified as historically black universities and colleges by type of activity, by agency, and by R&D obligations.

"R&D plant" in this report refers to large facilities and fixed equipment. Data on "research instrumentation" are not separately identifiable in this report. Research instrumentation funds are for equipment purchased under research project awards from current-fund accounts and are included under totals for research and development.

Some agencies not surveyed, such as the Department of Justice, may account for a significant proportion of the total receipts at some institutions, even though those receipts may constitute a small proportion of total academic R&D.

Obligations figures listed for individual institutions reflect direct Federal S&E support so that amounts subcontracted to other institutions are included. Those funds received through subcontract arrangements from prime contractors are excluded.

Federal obligations to institutions are presented on the basis of the individual institutions that are components of the system, but obligations awarded directly to the central administration of a system are listed separately. If the final destination of the funds is not known, however, the agencies report them as obligations to a system's administrative office, or "central system," from which the funds are distributed to the system's individual institutions.

Other Science Resources Studies Reports on Federal R&D Funding

In addition to the Survey of Federal Funds for Research and Development report, the NSF Division of Science Resources Studies publishes one other report related to Federal R&D funding. *National Patterns of R&D Resources* includes information on R&D expenditures by different performers including industry, academia, and the Federal Government. The expenditures data in *National Patterns*, with the exception of Federal intramural R&D, are based on sample surveys of the performers of R&D. Respondents are asked to report how much they actually spent on R&D during the year and the source of those funds. Data in *National Patterns* are based on expenditures reported by performers; performers of R&D often expend Federal funds in a different year from the one in which the Federal Government provided authorization, obligations, or outlays.

Definitions

Obligations are the amounts for orders placed, contracts awarded, services received, and similar transactions during a given period, regardless of when the funds were appropriated and when future payment of money is required. Obligations differ from expenditures in that funds allocated by Federal agencies during one fiscal year may be spent by the recipient institution either partially or entirely during one or more subsequent years.

Type of Institution

Universities and colleges are those institutions of higher education in the United States that offer at least 1 year of college-level study leading toward a degree. A university or college comprises all parts of an academic institution, such as colleges of liberal arts, professional schools, hospitals, schools of agriculture, and agricultural experiment stations, including bureaus, offices, and research centers (excluding FFRDCs), whether located on or off the main campus, and branch campuses controlled directly by the parent institution. The universe of academic institutions that is the foundation of this survey is derived from the higher education institutions' portion of the Department of Education's Integrated Postsecondary Education Data System (IPEDS), sponsored by the National Center for Education Statistics, and the *1995 Higher Education Directory*, published by Higher Education Publications, Inc.

Institutions included are those that received Federal S&E support during fiscal year 1994 and possessed a significant degree of academic and administrative autonomy. Institutions within a system (a group of institutions having a collective legal status and generally recognized by a State government, a board of education, or other relevant organization) in which a significant degree of autonomy remains at the individual institution level are presented separately; obligations to branch campuses are included in the totals for their parent institutions. The study excludes all obligations to the service academies and to the U.S. Department of Agriculture Graduate School.

Independent nonprofit institutions are legal entities other than universities and colleges, are privately organized or chartered to serve the public interest, and are exempt from most forms of Federal taxation. Data presented for nonprofit institutions and for nonprofit-administered FFRDCs are obligations for R&D and R&D plant reported by the 15 participating agencies.

Coverage of the nonprofit section in the Federal support survey was expanded beginning in the late 1970s to include all types of nonprofit institutions that receive Federal R&D funds. For NSF purposes the types of institutions are defined as follows:[1]

1. **Research institute.** A separately incorporated, independent nonprofit organization operating under the direction of its own controlling body, the primary function of which is the performance of R&D in the sciences and engineering.

2. **Voluntary hospital.** A member of the American Hospital Association not subject to the control of either Federal, State, or local governments, nor an integral part of any institution of higher education. Hospitals that have been set up by research institutes and that, although providing patient care, function primarily as laboratories for the research institutes are included in the "Research institute" category.

3. **All other independent nonprofit institutions.**
   (a) **Professional or technical society, or academy of science and engineering.** A voluntary association of individuals sharing a common interest in the advancement of knowledge, either within a single field or across a broad spectrum of disciplines. The major function of these organizations is to aid and encourage the collection, collation, and dissemination of S&E knowledge for the benefit of their members and the community as a whole.

   (b) **Private foundation.** A nongovernmental, nonprofit organization having a principal fund of its own, managed by its own trustees or directors, and established to maintain or to aid social, educational, charitable, religious, or other activities serving the common welfare. Private foundations include operating foundations that allocate the greater proportion of their R&D budgets to intramural performance and philanthropic foundations that allocate most of their funds to grants and contracts for research to be performed extramurally.

   (c) **Science exhibitor.** A nonprofit organization whose primary goal is to expand scientific literacy within the community by providing exhibits that display and interpret the latest scientific findings within its field or fields. Included in this category are museums, zoological parks, botanical gardens, and arboretums.

   (d) **Trade association.** An organization of business competitors, in a specific industry or business, that is interested primarily in the commercial promotion of products or services. Membership is usually held in the name of a business entity. Activities may fall into one or more of the following areas: business ethics, management practices, standardization, commercial (i.e., statistical) research, publication, promotion, and public relations.

   (e) **Agricultural cooperative.** An organization of individuals or business entities that are normally competitors in the production and sale of agricultural products. Activities may include one or more of the following areas: collective marketing or purchasing, research, public relations, and the improvement of the economic condition of the farm population of the United States.

Category of Support

Academic science and engineering includes all obligations for R&D; R&D plant; facilities and equipment for S&E instruction; fellowships, traineeships, and training grants (FTTGs); general support for science and engineering; and other S&E activities. These activities are defined as follows:

1. **Research and development** includes all research activities, both basic and applied, and all development activities that are supported at universities and colleges. Demonstration projects conducted to discover whether a technology or method is workable are considered to be within the scope of R&D if their objective is to produce new information within a specific time period.

[1] National Science Foundation, *R&D Activities of Independent Nonprofit Institutions, 1973* (NSF 75-308) (Washington, DC: GPO, 1975)

"Research" is defined as systematic study directed toward fuller scientific knowledge or understanding of the subject studied. Research can be classified as basic or applied, although data reported here are not separated into these categories. In basic research the investigation is oriented toward gaining a better knowledge or understanding of the fundamental aspects of phenomena and of observable facts without specific applications toward processes or products in mind. In applied research the investigation is aimed at gaining the knowledge or understanding necessary for determining the means by which a recognized and specific need may be met.

"Development" is the systematic use of knowledge and understanding gained from research directed toward the production of useful materials, devices, systems, or methods, including design and development of prototypes and processes.

Research and development excludes topographic mapping and surveys, collection of general-purpose statistics, and activities concerned primarily with the dissemination of scientific information. Also excluded are routine product testing, quality control, and R&D facilities and fixed equipment.

"Research equipment" is included as part of R&D. It includes any item (or interrelated collection of items constituting a system) of nonexpendable tangible property or software having a useful life of more than 2 years and an acquisition cost of $500 or more that is used wholly or in part for research.

2. **R&D plant** includes all costs—direct, indirect, and related—of all projects whose main objective is to provide support for the construction, acquisition, renovation, modification, repair, or rental of facilities, land, works, or equipment for use in scientific or engineering research and development. A facility is interpreted broadly to be any physical resource important to the conduct of R&D. Excluded are expendable research equipment and office furniture and equipment.

3. **Facilities and equipment** for S&E instruction include all programs whose main purpose is to provide support for the construction, acquisition, renovation, modification, repair, or rental of facilities, land, works, or equipment for use in instruction in science and engineering.

4. **Fellowships, traineeships, and training grants** include graduate programs in support of the development and maintenance of S&E personnel resources. The total amounts pertaining to such awards (stipends and cost-of-education allowances) are reported on the basis of the institution chosen by the recipient. Excluded are programs that support research and education institutes, seminars, and conferences such as teacher-training activities provided through teacher institutes, short courses, research participation, and in-service seminars; activities aimed at the development of education techniques and materials for use in S&E training; and programs that provide special opportunities for increasing the scientific knowledge and experience of precollege and undergraduate students. These activities are included in "other science and engineering activities" (see category 6) if they are S&E oriented.

5. **General support for science and engineering** includes programs that support nonspecific or generalized purposes related to scientific research and education. Such projects are generally oriented toward academic departments, institutes, or institutions as a whole and embody varying types of support—ranging from support provided without any specification of purpose other than that the funds be used for scientific projects to projects in which funds are provided for activities within a specified field of science and engineering without a specific purpose. The National Institutes of Health's (NIH's) Biomedical Research Support Grants and Minority Biomedical Support Grants are examples of these types of programs.

6. **Other S&E activities** include all academic S&E activities that cannot be assigned to one of the preceding five categories, including obligations in support of technical conferences, teacher institutes, and activities aimed at increasing the scientific knowledge of precollege and undergraduate students.

Federally Funded Research and Development Centers

The following is a list of federally funded research and development centers (FFRDCs) included in the Federal S&E support survey. The list is arranged by sponsoring agency and administering organization (in parentheses). Respondents reported under the FFRDC category funds that were obligated to the centers identified on this list.

Department of Defense

Office of the Secretary of Defense

Administered by other nonprofit institutions[1]

Institute for Defense Analyses (Institute for Defense Analyses), Alexandria, VA

Logistics Management Institute (Logistics Management Institute), McLean, VA[2]

National Defense Research Institute (RAND Corp.[3]), Santa Monica, CA

C3I Federally Funded Research and Development Center (MITRE Corp.[4]), Bedford, MA, and McLean, VA

Advanced Research Projects Agency

Administered by universities and colleges[5]

Software Engineering Institute (Carnegie Mellon University), Pittsburgh, PA

Department of the Navy

Administered by other nonprofit institutions[1]

Center for Naval Analyses, (Center for Naval Analyses), Alexandria, VA

Department of the Air Force

Administered by universities and colleges[5]

Lincoln Laboratory (Massachusetts Institute of Technology), Lexington, MA

Administered by other nonprofit institutions[1]

Aerospace Federally Funded Research and Development Center (Aerospace Corporation), El Segundo, CA

Project Air Force (RAND Corp.[3]), Santa Monica, CA

Department of the Army

Administered by other nonprofit institutions[1]

Arroyo Center (RAND Corp.[3]), Santa Monica, CA

Department of Energy

Administered by universities and colleges[5]

Ames Laboratory (Iowa State University of Science and Technology), Ames, IA

Argonne National Laboratory (University of Chicago), Argonne, IL

Brookhaven National Laboratory (Associated Universities, Inc.), Upton, Long Island, NY

Continuous Electron Beam Accelerator Facility (Southeastern Universities Research Association, Inc.), Newport News, VA

Ernest Orlando Lawrence Berkeley National Laboratory (University of California), Berkeley, CA

Fermi National Accelerator Laboratory (Universities Research Association, Inc.), Batavia, IL

Lawrence Livermore National Laboratory (University of California), Livermore, CA

Los Alamos National Scientific Laboratory (University of California), Los Alamos, NM

Oak Ridge Institute for Science and Education (Oak Ridge Associated Universities, Inc.), Oak Ridge, TN

Princeton Plasma Physics Laboratory (Princeton University), Princeton, NJ

Stanford Linear Accelerator Center (Leland Stanford Junior University), Stanford, CA

Administered by other nonprofit institutions[1]

Inhalation Toxicology Research Institute (Lovelace Institutes), Albuquerque, NM

National Renewable Energy Research Laboratory[6] (Midwest Research Institute), Golden, CO

Pacific Northwest Laboratories (Battelle Memorial Institute), Richland, WA

National Aeronautics and Space Administration

Administered by universities and colleges[5]

Jet Propulsion Laboratory (California Institute of Technology), Pasadena, CA

National Science Foundation

Administered by universities and colleges[5]

National Astronomy and Ionosphere Center (Cornell University), Arecibo, PR

National Center for Atmospheric Research (University Corporation for Atmospheric Research), Boulder, CO

National Optical Astronomy Observatories[7] (Association of Universities for Research in Astronomy, Inc.), Tucson, AZ

National Radio Astronomy Observatory (Associated Universities, Inc.), Green Bank, WV

Administered by other nonprofit institutions[1]

Critical Technologies Institute (RAND Corp.[3]), Washington, DC

Nuclear Regulatory Commission

Administered by other nonprofit institutions[1]

Center for Nuclear Waste Regulatory Analyses (Southwest Research Institute), San Antonio, TX

Department of Transportation

Federal Aviation Administration

Administered by other nonprofit institutions[1]

Center for Advanced Aviation System Development (MITRE Corp.[4]), McLean, VA

Department of the Treasury

Internal Revenue Service

Administered by other nonprofit institutions[1]

Tax Systems Modernization Institute (IIT Research Institute), Lanham, MD

Endnotes

[1] That is, other than universities and colleges.

[2] Logistics Management Institute (LMI) moved from Bethesda, MD, to McLean, VA, in May 1994.

[3] The following portions of the RAND Corporation should be reported as FFRDCs: Project Air Force, National Defense Research Institute (formerly Defense Office of the Joint Chiefs of Staff), the Arroyo Center, and the Critical Technologies Institute. All other agency support to RAND is reported under nonprofit institutions.

[4] Only the C3I Federally Funded Research and Development Center and the Center for Advanced Aviation System Development parts of the MITRE Corporation are FFRDCs. All other agency support to MITRE should be reported under nonprofit institutions.

[5] Includes university consortia.

[6] In September 1991 the name was changed from Solar Energy Research Institute.

[7] Since February 1984 this center has included three former FFRDCs: Cerro Tololo Inter-American Observatory, Kitt Peak National Observatory, and the National Solar Observatory (formerly Sacramento Peak Observatory).

NOTE: The Department of the Army decertified the Institute for Advanced Technology (University of Texas), Austin, TX, as an FFRDC in November 1993. All obligations previously reported to this institution should be reported under universities and colleges.

SECTION B.

DETAILED STATISTICAL TABLES: FEDERAL SCIENCE AND ENGINEERING OBLIGATIONS

To obtain accurate historical data, use only the latest detailed statistical tables (covering FY 1994) and not data published earlier. Data presented in trend tables are assembled from the most recent completed survey cycle. Data for prior years are reviewed for consistency with current-year responses and, when necessary, are revised in consultation with agencies and/or institutions. For that reason, references to prior-years' data should be restricted to those published in this document.

Table *Page*

Federal S&E Obligations to Universities and Colleges

Trends

B-1 Federal obligations for science and engineering (S&E) to universities and colleges, by type of activity: fiscal years 1963–94 23

B-2 Federal obligations for science and engineering to universities and colleges, by type of activity and agency: fiscal years 1963–94 24

B-3 Federal obligations for science and engineering to universities and colleges, by geographic division and State: fiscal years 1987–94 29

B-4 Federal obligations for science and engineering to the 100 universities and colleges receiving the largest amounts, ranked by total amount received in fiscal year 1994: fiscal years 1987–94 31

B-5 Federal obligations for science and engineering research and development to universities and colleges, by geographic division and State: fiscal years 1987–94 33

B-6 Federal obligations for science and engineering research and development to the 100 universities and colleges receiving the largest amounts, ranked by total amount received in fiscal year 1994: fiscal years 1987–94 35

Summary

B-7 Federal obligations for science and engineering (S&E) to universities and colleges, by agency and type of activity: fiscal year 1994 37

Geographic Distribution, Fiscal Year (FY) 1994

B-8 Federal obligations for science and engineering (S&E) to universities and colleges and the number of recipient institutions, by State and type of activity: fiscal year 1994 38

B-9 Federal obligations for science and engineering to universities and colleges, by geographic division, State, and agency: fiscal year 1994 42

B-10 Federal obligations for fellowships, traineeships, and training grants to universities and colleges, by geographic division, State, and agency: fiscal year 1994 44

100 Institutions Ranked in Order of Amount Received, FY 1994

B-11 Federal obligations for science and engineering (S&E) to the 100 universities and colleges receiving the largest amounts, ranked by total amount received, by type of activity: fiscal year 1994 46

B-12 Federal obligations for science and engineering to the 100 universities and colleges receiving the largest amounts, ranked by total amount received, by agency: fiscal year 1994 48

B-13 Federal obligations for science and engineering research and development to the 100 universities and colleges receiving the largest amounts, ranked by total amount received, by agency: fiscal year 1994 51

B-14 Federal obligations for fellowships, traineeships, and training grants to the 100 universities and colleges receiving the largest amounts, ranked by total amount received, by agency: fiscal year 1994 54

Institutional Listings, by State, FY 1994

B-15 Federal obligations for science and engineering (S&E) to universities and colleges, by State, institution, and type of activity: fiscal year 1994 56

B-16 Federal obligations for science and engineering to universities and colleges, by State, institution, and agency: fiscal year 1994 79

B-17 Federal obligations for science and engineering research and development to universities and colleges, by State, institution, and agency: fiscal year 1994 104

B-18 Department of Defense obligations for science and engineering research and development (R&D) to universities and colleges, by State and institution: fiscal year 1994 128

B-19 Federal obligations for R&D plant to universities and colleges, by State, institution, and agency: fiscal year 1994 137

Historically Black Colleges and Universities

B-20 Federal obligations for science and engineering to historically black colleges and universities, ranked by total amount received in fiscal year 1994: fiscal years 1987–94 143

B-21 Federal obligations for science and engineering (S&E) to historically black colleges and universities, ranked by total amount received, by type of activity: fiscal year 1994 145

B-22 Federal obligations for science and engineering to historically black colleges and universities, ranked by total amount received, by agency: fiscal year 1994 147

B-23 Federal obligations for science and engineering research and development to historically black colleges and universities, ranked by total amount received in fiscal year 1994: fiscal years 1987–94 149

B-24 Federal obligations for science and engineering research and development to historically black colleges and universities, ranked by total amount received, by agency: fiscal year 1994 151

Systems of Universities and Colleges, FY 1994

B-25 Federal obligations for science and engineering to systems of universities and colleges, ranked by total amount received, by agency: fiscal year 1994 153

B-26 Federal obligations for science and engineering research and development to systems of universities and colleges, ranked by total amount received, by agency: fiscal year 1994 155

Federal S&E Obligations to Nonprofit Institutions

B-27 Federal obligations for science and engineering research and development and R&D plant to the 100 nonprofit institutions receiving the largest amounts, ranked by total amount received in fiscal year 1994: fiscal years 1987–94 157

B-28 Federal obligations for science and engineering research and development and R&D plant to independent nonprofit institutions, by geographic division, State, institution, and agency: fiscal year 1994 159

B-29 Federal obligations for science and engineering research and development and R&D plant to research institutes, ranked by total amount received, by agency: fiscal year 1994 184

B-30 Federal obligations for science and engineering research and development and R&D plant to voluntary hospitals, ranked by total amount received, by agency: fiscal year 1994 190

B-31 Federal obligations for science and engineering research and development and R&D plant to other independent nonprofit institutions, ranked by total amount received, by agency: fiscal year 1994 198

Federal S&E Obligations to Selected Consortia

B-32 Federal obligations for science and engineering to selected consortia of institutions: fiscal years 1987–94 208

B-33 Federal obligations for science and engineering (S&E) to selected consortia of institutions, by type of activity: fiscal year 1994 209

B-34 Federal obligations for science and engineering to selected consortia of institutions, by agency: fiscal year 1994 210

Federal S&E Obligations to Federally Funded Research and Development Centers

B-35 Federal science and engineering (S&E) obligations to federally funded research and development centers administered by universities and colleges, by State, institution, agency, and type of activity: fiscal year 1994 211

B-36 Federal science and engineering research and development and R&D plant obligations to federally funded research and development centers administered by nonprofit institutions, by State, institution, and sponsoring agency: fiscal years 1987–94 214

Table B-1. Federal obligations for science and engineering (S&E) to universities and colleges, by type of activity: fiscal years 1963-94

[Thousands of dollars]

Fiscal year	Total	Research and development [1]	R&D plant [1]	Facilities for instruction in S&E	Fellowships, traineeships, and training grants	General support for S&E	Other S&E activities [1]
1963	1,328,511	829,524	105,896	(2)	(2)	(2)	393,091
1964	1,528,604	975,597	100,837	(2)	(2)	(2)	452,170
1965	1,816,171	1,094,963	126,196	(2)	(2)	(2)	595,012
1966	2,163,504	1,252,146	114,767	(2)	365,560	(2)	431,031
1967	2,323,795	1,301,242	111,309	(2)	447,236	(2)	464,008
1968	2,349,817	1,398,305	96,148	(2)	440,895	(2)	414,469
1969	2,361,399	1,474,681	54,516	(2)	436,270	(2)	395,932
1970	2,187,579	1,446,618	44,778	(2)	429,408	(2)	266,775
1971	2,343,129	1,551,391	29,942	28,729	421,029	99,669	212,369
1972	2,599,111	1,853,085	36,917	26,341	387,888	83,288	211,592
1973	2,464,362	1,870,690	43,338	13,372	287,210	38,964	210,788
1974	2,736,984	2,085,204	29,009	3,506	326,600	86,974	205,691
1975	2,805,877	2,246,182	44,787	5,026	201,273	46,353	262,256
1976	2,959,656	2,430,970	23,899	3,210	174,871	74,483	252,223
1977	3,351,337	2,803,017	36,471	3,282	184,671	75,928	247,968
1978	3,962,500	3,388,438	34,328	4,906	205,925	74,398	254,505

[1] See Technical Notes, "Scope of Survey."

[2] Not separately identified but included under "Other S&E activities"

NOTE: Some trend shifts are related to institutional reclassification. As of 1978 two laboratories that were formerly considered academically administered federally funded research and development centers became part of their respective institutions: Applied Physics Laboratory (Johns Hopkins University) and Applied Research Laboratory (Pennsylvania State University). Data for these laboratories are thus included in the academic figures for 1978-94 but are excluded for prior years. Similarly, Draper Laboratories separated from the Massachusetts Institute of Technology as of fiscal year 1974 to become an independent nonprofit institution. Academic data shown for 1963-73 include Draper Laboratories, whereas those for 1974-94 do not.

[1] See Technical Notes, "Scope of Survey."

[2] Data shown for fiscal years 1963-74 and fiscal years 1975-77 represent obligations of the Atomic Energy Commission and the Energy Research and Development Administration, respectively.

[3] Department of Defense (DoD) research is reported separately from DoD development. DoD states that more than 90 percent of its development reported for "universities and colleges" is performed at university-administered laboratories that are separate from the academic departments. Furthermore, DoD states that much of its development obligations are for major systems development, that such obligations differ from its obligations for advanced technology development, and that DoD total development obligations are therefore not comparable with development obligations at other Federal agencies. Refer to table B-18 for DoD obligations to individual institutions, by research and development breakdowns.

[4] Data collected before this year are not separately identified but are included under "Other S&E activities."

NOTE: Some trend shifts are related to institutional reclassification. As of 1978 two laboratories that were formerly considered academically administered federally funded research and development centers became part of their respective institutions: Applied Physics Laboratory (Johns Hopkins University) and Applied Research Laboratory (Pennsylvania State University). Data for these laboratories are thus included in the academic figures for 1978-94 but are excluded for prior years. Similarly, Draper Laboratories separated from the Massachusetts Institute of Technology as of fiscal year 1974 to become an independent nonprofit institution. Academic data shown for 1963-73 include Draper Laboratories, whereas those for 1974-94 do not.

KEY:
USDA = U.S. Department of Agriculture
Com = Department of Commerce
DoD = Department of Defense
OEO = Office of Economic Opportunity
Ed = Department of Education
DOE = Department of Energy
EPA = Environmental Protection Agency
HHS = Department of Health and Human Services
HUD = Department of Housing and Urban Development
Int = Department of the Interior
AID = Agency for International Development
NASA = National Aeronautics and Space Administration
NSF = National Science Foundation
NRC = Nuclear Regulatory Commission
DOT = Department of Transportation
NA = Not available
** = Amount less than $50,000

[1] Department of Defense (DoD) research is reported separately from DoD development. DoD states that more than 90 percent of its development reported for "universities and colleges" is performed at university-administered laboratories that are separate from the academic departments. Furthermore, DoD states that much of its development obligations are for major systems development, that such obligations differ from its advanced technology development, and that DoD total development obligations are therefore not comparable with development obligations at other Federal agencies. Refer to table B-18 for DoD obligations to individual institutions, by research and development breakdowns.

[2] See Technical Notes, "Scope of Survey."

[1] The Department of Defense (DoD) states that more than 90 percent of its development reported for "universities and colleges" is performed at university-affiliated laboratories that are separate from the academic departments. Furthermore, DoD states that much of its development obligations are for major systems development, that such obligations differ from its obligations for advanced technology development, and that DoD total development obligations are therefore not comparable with development obligations at other Federal agencies. Refer to table B-18 for DoD obligations to individual institutions, by research and development breakdowns.

[2] Includes Department of Transportation, Agency for International Development, Department of Housing and Urban Development, Department of Labor, Nuclear Regulatory Commission, and Department of the Interior.

NOTE: Does not include R&D obligations to university-administered federally funded research and development centers. See table B-35.

KEY: USDA = U.S. Department of Agriculture
Com = Department of Commerce
DoD = Department of Defense
Ed = Department of Education
DOE = Department of Energy
EPA = Environmental Protection Agency
HHS = Department of Health and Human Services
NASA = National Aeronautics and Space Administration
NSF = National Science Foundation

[1] The Department of Defense (DoD) states that more than 90 percent of its development reported for "universities and colleges" is performed at university-affiliated laboratories that are separate from the academic departments. Furthermore, DoD states that much of its development obligations are for major systems development, that such obligations differ from its obligations for advanced technology development, and that DoD total development obligations are therefore not comparable with development obligations at other Federal agencies. Refer to table B-18 for DoD obligations to individual institutions, by research and development breakdowns.

[2] Includes Department of Transportation, Agency for International Development, Department of Housing and Urban Development, Department of Labor, Nuclear Regulatory Commission, and Department of the Interior.

NOTE: Does not include R&D obligations to university-administered federally funded research and development centers. See table B-35.

KEY: USDA = U.S. Department of Agriculture
Com = Department of Commerce
DoD = Department of Defense
Ed = Department of Education
DOE = Department of Energy
EPA = Environmental Protection Agency
HHS = Department of Health and Human Services
NASA = National Aeronautics and Space Administration
NSF = National Science Foundation

NOTE: Department of Defense (DoD) research is reported separately from DoD development. DoD states that more than 90 percent of its development reported for "universities and colleges" is performed at university-administered laboratories that are separate from the academic departments. Furthermore, DoD states that much of its development obligations are for major systems development, that such obligations differ from its obligations for advanced technology development, and that DoD total development obligations are therefore not comparable with development obligations at other Federal agencies.

[1] The Department of Defense (DoD) states that more than 90 percent of its development reported for "universities and colleges" is performed at university-affiliated laboratories that are separate from the academic departments. Furthermore, DoD states that much of its development obligations are for major systems development, that such obligations differ from its obligations for advanced technology development, and that DoD total development obligations are therefore not comparable with development obligations at other Federal agencies. Refer to table B-18 for DoD obligations to individual institutions, by research and development breakdowns.

[2] Includes Department of Transportation, Agency for International Development, Department of Housing and Urban Development, Department of Labor, Nuclear Regulatory Commission, and Department of the Interior

KEY:
USDA = U.S. Department of Agriculture
Com = Department of Commerce
DoD = Department of Defense
Ed = Department of Education
DOE = Department of Energy
EPA = Environmental Protection Agency
HHS = Department of Health and Human Services
NASA = National Aeronautics and Space Administration
NSF = National Science Foundation

[1] The Department of Defense (DoD) states that more than 90 percent of its development reported for "universities and colleges" is performed at university-affiliated laboratories that are separate from the academic departments. Furthermore, DoD states that much of its development obligations are for major systems development, that such obligations differ from its obligations for advanced technology development, and that DoD total development obligations are therefore not comparable with development obligations at other Federal agencies. Refer to table B-18 for DoD obligations to individual institutions, by research and development breakdowns.

[2] Includes Department of Transportation, Agency for International Development, Department of Housing and Urban Development, Department of Labor, Nuclear Regulatory Commission, and Department of the Interior

NOTE: Includes obligations to every individual institution included within each system

KEY:
USDA = U.S. Department of Agriculture
Com = Department of Commerce
DoD = Department of Defense
Ed = Department of Education
DOE = Department of Energy
EPA = Environmental Protection Agency
HHS = Department of Health and Human Services
NASA = National Aeronautics and Space Administration

[1] The fiscal year (FY) 1992, 1993, and 1994 obligations from the Department of Defense (DoD) to the Rand Corp. were mostly reported to three federally funded research and development centers administered by the Rand Corp.: Project Air Force, the Arroyo Center, and the National Defense Research Institute. FY 1991 obligations from DoD for the four entities were all reported as the Rand Corp.
